Number of pages: 3

Number of figures: 2

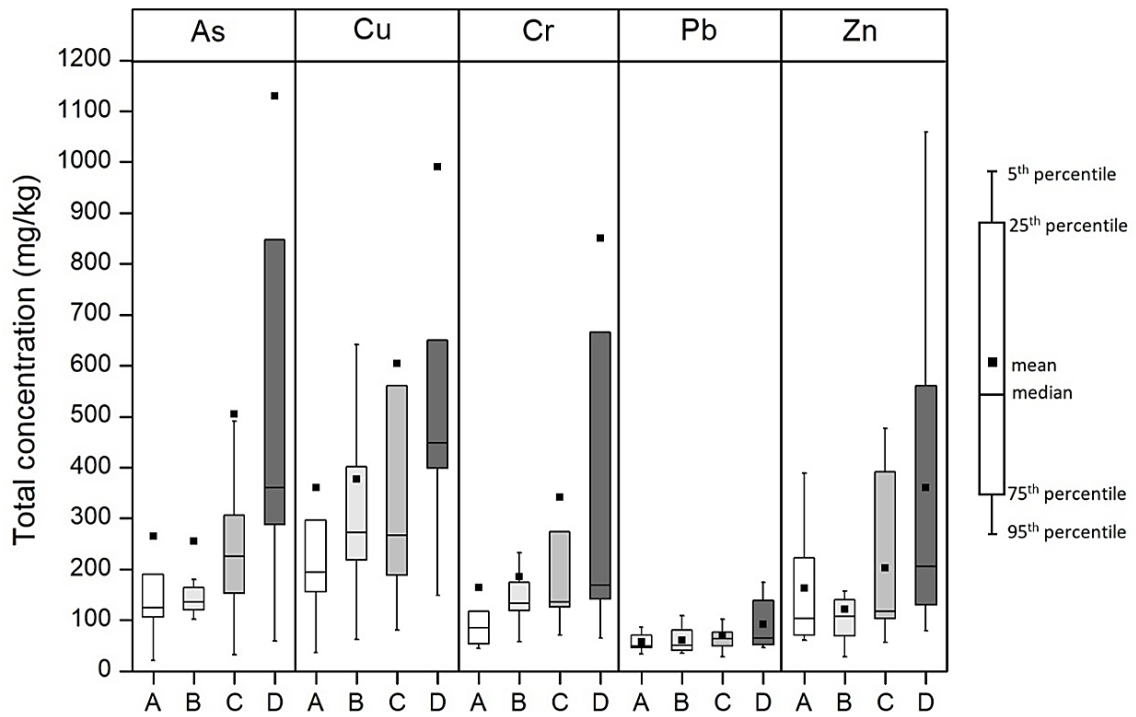

Figure 1: Boxplot of total metal(loid)s concentrations in different particle sizes of soil samples (n=10). A : < 2 mm, B : 250-90 μ m, C : 90-20 μ m, D : < 20 μ m. The outliers are not shown.

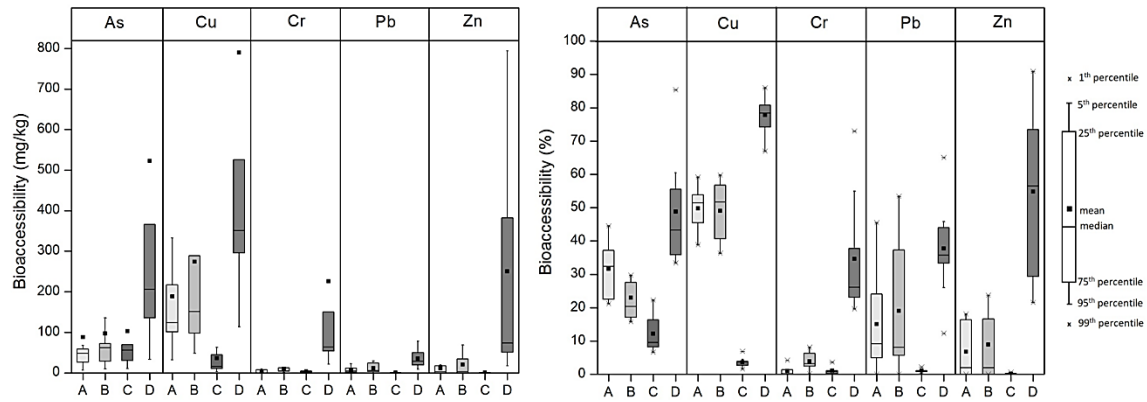

Figure 2: Boxplot of bioaccessibility (mg/kg and %) of metal(loid)s in different particle size of soil samples (n=10) using different methods. A = IVG-GI (250-90 μm), B = IVG-GI (90-20 μm), C = GS (< 20 μm), D = ALF (< 20 μm). The outliers are not shown in the boxplot of bioaccessibility (mg/kg).
